IMPORTANT INFORMATION ON VEHICLE LOADING

OVERLOADING

CAUTION: The components of your truck are designed to provide satisfactory service if the vehicle is not loaded in excess of either the gross vehicle weight rating (GVWR) or the maximum front and rear gross axle weight ratings (GAWR's). These ratings are listed on the Vehicle Identification Number (VIN) plate, which is located on the left rear panel behind the driver's seat.

Overloading can result in loss of vehicle control and personal injury, either by causing component failures or by affecting vehicle handling. It can also shorten the service life of your vehicle.

Your dealer can advise you of the proper loading conditions for your vehicle. Using selected heavier suspension components for added durability may not increase any of the weight ratings shown on the Vehicle Identification Number (VIN) and Weight Rating Plate, and the Vehicle Certification Label.

	Maximum GVWR lbs (kg)	Front GAWR Capacity lbs (kg)	Rear GAWR Capacity lbs (kg)
NPR	12,000 (5443)	4,700 (2132)	7,950 (3606)
